As an Information Systems graduate with a strong interest in mobile intelligent systems and agentic AI, I aim to explore how AI-driven decision support can enhance early-stage product development and human-AI collaboration. Over the past years, I have integrated technical development with user-centered design and real product execution as a mobile developer and CTO. My experience building AI-enhanced applications has strengthened my interest in research on mobile AI agents, product reasoning systems, and Human-AI interaction.

🔍 RESEARCH INTERESTS

Mobile Agentic AI, Mobile Intelligent Systems, Human-AI Interaction, Collaborative AI

🎓 EDUCATION

Universitas Andalas

Bachelor of Information Systems (GPA 3.41/4.00)

Padang, Indonesia

2021.08 – 2026.02 (Expected)

• Relevant Coursework:

- *AI & Data Science*: Machine Learning Applications, Decision Support Systems, Data Mining, Data Analysis and Visualization.
- *Mobile & Systems*: Mobile Technology Programming, Multiplatform Programming, Cloud Computing, Software Engineering.
- *Research & Interaction*: Human and Computer Interaction, Research Methods.

- **MSIB Program at Infinite Learning Indonesia (Remote)**: Completed Non-Degree Professional Training in Android Mobile Application Development (2023.08 – 2023.12).
- **Undergraduate Thesis**: Developed an iOS-based Exam Competency learning app using SwiftUI, Golang, React, and Gemini API to enhance accessibility and user experience.

📖 PUBLICATIONS

- [1] **Empowerment of Inter-Student Achievements as a Form of Manifestation “Mapres Copy Mapres” Sustainable Irfan Wahendra, et al.**
Proceedings of the International Conference on Entrepreneurship, Leadership and Business Innovation (ICELBI 2022). Atlantis Press.
DOI: 10.2991/978-94-6463-350-4_34

💼 PROFESSIONAL EXPERIENCE

Teamly – CTO / Co-Founder

2025.09 – Present

- Led the research and development of an AI-driven system architecture for startup team matching, improving profile mapping accuracy by 80% through algorithmic optimization.
- Developed an LLM-based recommendation algorithm (Gemini & OpenAI) focusing on prompt engineering research, achieving a 100% validation success rate (n=20) during the beta testing phase.
- Optimized technical resource efficiency by implementing automated workflows, effectively accelerating co-founder search iteration cycles by 35% while reducing operational costs.

Appskep – UI/UX Designer

2022.08 – Present

- Directed the design research and development cycle for 5+ cross-platform digital products in the healthcare and education sectors by applying User-Centered Design (UCD) methodologies.
- Engineered a standardized Design System that improved the Software Development Life Cycle (SDLC) efficiency by 50% through component modularity and design-to-code consistency.
- Analyzed user behavior and designed data-driven interfaces for a large-scale digital health platform serving 200,000+ users, focusing on cognitive load reduction and system accessibility.

Hirai.io – UI/UX Designer

2025.03 – 2025.07

- Analyzed AI-driven recruitment workflows to reduce candidate screening time by 35% through information hierarchy optimization.
- Validated design hypotheses via interactive prototyping, achieving a 90% Task Success Rate before production.

Tokopedia Academy – Student Tech Hub Ambassador

2023.06 – 2024.10

- Facilitated technical knowledge transfer through organizing workshops, engaging 500+ student participants in technology discussions.
- Analyzed participant feedback data to improve future event curriculums and engagement strategies.

Diskas – Founder

2021.12 – 2024.08

- Developed a mentorship platform based on user need assessments, facilitating skills growth for 150+ monthly active users.
- Managed strategic collaborations with 3+ institutions to test sustainable mentorship business models.

🏆 ACHIEVEMENTS

- **Gold Medal** – Seoul International Invention Fair 2024
- **Special Award** – China Invention Association (2024)
- **Startup Grant Recipient** – Secured funding of ~USD 977 from SOEs (2024)
- **Champion** – National Poster Design Competition
- **TOP 25** – Entrepreneur Competition LPDP (2021)
- **TOP 150** – Social Project Innovillage (2022)

💻 TECHNICAL SKILLS

- **AI & Data Science:** Python, NumPy, Pandas, SciPy, Seaborn, Machine Learning, Prompt Engineering, Data Analysis.
- **HCI & Research:** Quantitative & Qualitative Research Methods, User-Centered Design (UCD), Usability Testing, Figma, Prototyping.
- **Mobile Development:** Swift, SwiftUI, UIKit, Xcode, Android Development, Kotlin, Jetpack Compose, Dart, Flutter, MVVM.
- **Backend & Tools:** Golang, FastAPI, React, MySQL, Firebase, Supabase, Git, Docker, N8N.
